Coil Tubing Unit: Generation III Mast & Conventional

Essential Coil Well Service Generation III coil tubing units represent the benchmark for deep versatility in coil tubing. These units are availble in both mast and conventional style with 10K or 15K pressure control to service any deep high pressure well. Most tubing sizes can be transported in the unit, maintaining the rig up efficiencies of the Generation II while providing extra reach and force at bottom when needed.

Mast or conventional style configuration
10K or 15K pressure control
130K injector head
5⅛" BOPs and tandem packoff
Separate doghouse includes 6.0 m³ fuel capacity

Generation III Reel Capacities

Coil Outer Diameter (millimeters/inches)	Pipe Length (meters/feet)
50.8mm / 2.0"	8,400 / 27,559
60.3mm / 2 ⅜"	6,500 / 21,325
66.7mm / 2 ⅝"	5,200 / 17,060
73.0mm / 2 ⅞"	4,300 / 14,107
