

Coil Tubing Unit: Generation I Conventional

Essential Coil Well Service Generation I coil tubing units offer versatility for a wide range of specialty applications utilizing smaller pipe diameters and unique wellhead configurations. Paired with ECWS 45T crane units, our team of expert field operators can execute the most obscure job requirements safely and effectively for flexibility unmatched by jointed pipe applications.

- 5K or 10K pressure control
- Limitless lubricator length
- 60K or 80K injector head
- Up to 200ft hydraulics reach
- 3", 4 $\frac{1}{16}$ ", or 5 $\frac{1}{8}$ " BOPs and available tandem packoff
- Cerberus/Orion well monitoring & fatigue management

Generation I Reel Capacities

Coil Outer Diameter (millimeters/inches)	Pipe Length (meters/feet)
38.1mm / 1 1/2"	8,150 / 26,738
44.5mm / 1 3/4"	5,580 / 18,307
50.8mm / 2.0"	4,500 / 14,763
60.3mm / 2 3/8"	2,700 / 8,858
